

Build a Cyber-Resilient Business

with AI-Powered Security and Networking

Integrated Network and Cybersecurity Solutions

From managing your entire network to securing your digital environment, iOPEX covers the full lifecycle, delivering high-performance solutions and services that ensure secure business operations. We have introduced automation and AI-led interventions in security operations and Threat intelligence to simplify complex operations and proactively address issues before they impact your organization.

- SIEM Operations
- Endpoint Protection
- Faster incident response
- Real-time threat detection
- Efficient SOC
- Gen-AI in Cybersecurity
- IDAM

Advanced Defense Against Evolving Threats

Modern Security Stack

We offer advanced firewall management, endpoint protection, and real-time threat intelligence, safeguarding your entire infrastructure.

Identity and Access Management (IDAM)

Our IDAM solutions secure and control access to critical assets, ensuring that only authorized users and devices can interact with sensitive data.

Robust Tech Stack

We enforce zero-trust security framework across users, devices, and networks while leveraging top-tier technologies like Palo Alto Networks, Splunk, & Cloudflare to build proactive defenses.

GenAI Powered Service

Our GenAI platform, ElevAlte, powers predictive maintenance, anomaly detection, and automated remediation to minimize downtime and boost security.

The iOPEX Advantage

Holistic Management

We manage everything from network performance to advanced threat detection, providing solutions that scale with your business, regardless of size.

Tailored Solutions

Our services are customized to meet your specific needs and as per your industry, allowing you to focus on what matters most—growing your business.

Complete Visibility

We provide comprehensive visibility across network and security operations, ensuring your organization remains compliant and secure.

Cost Efficient Security

With AI and automation at the core of our offerings, we help reduce operational costs by up to 50% while ensuring your network and security frameworks remain scalable for future growth.
